Jonas Laux, M.Sc.

Staff Software Engineer | AI Agents | Cloud & Data Platforms
Vienna, Austria | me@jonas-laux.com | +43 681 819 4310 | LinkedIn | GitHub

Profile

Staff engineer building enterprise AI agents, production platforms and cloud-native data products. Experience across agent runtimes, full-stack applications, multi-cloud architecture and large-scale data processing; previously co-founded software for hospital workflows.

Experience

Staff Software Engineer *Bobsled* *Sep 2026–Present*

- Build and operate an enterprise AI platform: durable agent execution, shared tool contracts and failure recovery across web, CLI, API, Slack and MCP surfaces.
- Strengthen tenant isolation, access controls and observability; build product-health and cost telemetry and automate customer provisioning and deployments with Pulumi.
- Help move engineering toward agent-driven development with Claude Code, Cursor and Codex in isolated worktrees, using specs, reusable context, review and live verification.

Senior Software Engineer *Bobsled* *Apr 2024–Sep 2026*

- Shipped enterprise agents with Claude and LangGraph; contributed to the newer Eve-based agent platform.
- Built TypeScript/React applications and event-driven services across GCP, AWS and Azure; delivered Spark/Iceberg pipelines spanning BigQuery, Snowflake and Databricks.
- Automated infrastructure and delivery with Terraform/CDKTF, Pulumi, Cypress, Vitest, Playwright and GitHub Actions.

Senior Cloud Architect *Anyline* *May 2022–Apr 2024*

- Designed infrastructure as code for ISO compliance and scalable operations; implemented Kubernetes and serverless workloads for data lakes and ML pipelines.
- Advised engineering teams on cloud architecture, code quality and delivery processes.

Technical Architect *ÖBB* *Jan–Apr 2022*

- Supported on-premises-to-Azure migration; developed feature architectures and shaped the technical roadmap with the engineering team.

Cloud Architect *Anyline* *May 2021–Jan 2022*

- Translated business requirements into architecture across GCP, Azure, AWS and IBM Cloud; built Kubernetes/OpenShift services and high-volume ML data infrastructure.

Full Stack Developer *Anyline* *Mar 2016–May 2021*

- Designed on-premises and cloud software; built microservices, databases and cross-platform apps, and led internal tooling projects.

Co-Founder & Software Engineer *Apollon OG* *May 2019–Aug 2021*

- Built software to improve hospital workflows in oncology; co-authored a pilot study on structured data acquisition in prostate cancer screening.

Earlier: Backend Developer, ImmoWire (2015); Web Developer, Kutech (2014) and kaufhaus.com (2012–2013).

Education & Publication

M.Sc., Media Informatics, University of Vienna (2018) | B.Sc., Media Informatics, Technische Hochschule Mittelhessen (2013).
Toward a Platform for Structured Data Acquisition in Oncology: A Pilot Study on Prostate Cancer Screening (2021).
